

LABO 7101

SPECIAL SELF-DRYING ANTI-STATIC FILM CLEANER

THE PROFESSIONAL RANGE

Powerful detergent to eliminate static film

Self-drying

FOOD CONTACT APPROVED

DESCRIPTION

LABO 7101 has been formulated to facilitate the cleaning of vehicles (cars, trucks, etc.).

It removes all static film without scrubbing.

It saves time. Vehicles are left clean and shiny.

LABO 7101 can be used in foam systems.

LABO 7101 is food contact approved.

DIRECTIONS FOR USE

LABO 7101 is always used diluted with water, between 2.5% and 5%, depending on the degree of vehicle soiling.

When using a sprayer, prepare a solution of product between 2.5% and 5%.

Spray the solution onto the vehicle, always working from the bottom up. Leave to work for 1 to 3 minutes, then rinse with cold or hot water, using a 70 to 100 bar pressure washer.

For car wash systems, use the same spraying principle. The mechanical action ensures more effective vehicle cleaning.

LABO 7101 can be used directly in pressure washers, with a dilution of 3 to 8%, a pressure of 70 to 100 bars and a temperature of 60 to 70°C.

LABO 7101 can also be used in foam systems, with suitable equipment. In this case, the dilution rate is between 5% and 10%, to obtain a compact foam. A final rinse is necessary.

Caution : in all cases, never allow the product to dry on the bodywork, and avoid working in extreme heat.

LABO 7101 may alter aluminum if not rinsed thoroughly.

PRECAUTIONS FOR USE

Case 4 x 5L

Jerrycans : 20 - 30L

Drums : 30-60-210L

IBC 1000L
