

SILTEC

QUICKLY

THE HIGH QUALITY
MICROFIBER CLOTH

THE PROFESSIONAL RANGE

DESCRIPTION

The microfiber cloth **QUICKLY** facilitates the cleaning and wiping of several surfaces such as glasses, enamel or stainless steel, and this, thanks to its extra absorbing and antistatic power. It is convenient, cost-efficient and easy to use.

INSTRUCTIONS

The microfiber **QUICKLY** can be used dry or wet. Indeed, the cloth attracts dust on all surfaces thanks to its electrostatic power. Wet, it facilitates the efficient cleaning of greases which were deposited on the surfaces to be treated. When adding a cleaning product, the efficiency of the used product increases tenfold and enables to divide the product quantities to use (environment protection and cost saving).

Thanks to its efficiency, the **QUICKLY** cloth enables a fast cleaning, without any effort and without risk for the surfaces to be treated.

PRECAUTIONS

Do not use bleach or even softener because these two products deteriorate the microfiber cloth's quality. The microfiber cloth **QUICKLY** can be machine-washed.

PACKAGING

100 pieces / case
(40 cm x 40 cm)

The information in our brochures, letters, reviews and reports is provided to advise you especially regarding testing that has been carried out, with an ongoing concern for objectivity and without any commitment on our part.
