DND

DESCALING AGENT – INJECTOR CLEANER – CAR GASKET STRIPPER

THE PROFESSIONAL RANGE

DESCRIPTION

- **DND** is a semi-liquid descaling agent, formulated from a new generation of oxygenated solvents, without Methylene chloride, N-Methyl-Pyrrolidone and Methanol.
- **DND** allows the cleaning of injectors. Powerful descaling agent, it also removes residues from cylinder head gaskets.
- **DND** can be used in the field of cleaning and stripping. The parts thus stripped do not need to be rinsed with water. A simple wipe is all you need.
- **DND** active formula penetrates deeply to easily dissolve calamines. Thanks to its good resistance, it can be used on horizontal and vertical surfaces.
- Its aerosol packaging allows it to reach hard-to-reach places.

INSTRUCTIONS

The use of gloves and safety glasses is recommended. Work in a ventilated atmosphere.

Shake the aerosol well before use until the ball is completely detached. Spray about 20 cm on the treated surfaces using the time necessary to cover them properly. Let it work for a few minutes. The appearance of vermicles and bubbles indicates the effectiveness of the product. Cleaning the stripped parts can be done with a dry cloth, a spatula, or a wire brush. Repeat the operation if necessary.

Cleanse the aerosol upside down after each use. Do not spray near working electrical equipment. Can only be used when the equipment is not powered on. Wait 5 minutes before turning the equipment on again.

PRECAUTIONS

Product for professional use. Consult the MSDS (upon request only).

The information in our brochures, letters and reports is provided to advise you especially regarding testing that has been carried out, with an ongoing concern for objectivity and without any commitment on our part
