## ECOLOGICAL COTTON - BASED ABSORBENT

### THE PROFESSIONAL RANGE

### AUTOMOBILES - MOTORCYCLES - BOATS - GO KARTS

#### DESCRIPTION

**ROXYSORB** is a drying absorbent, made from recycled natural biomass (Cotton flowers). **ROXYSORB** completely encapsulates and immobilizes any spill so that the surface is left clean and dry.

**ROXYSORB** is designed for use on all hard surfaces to absorb petrol, oil and diesel spills.

It can also be used on animal, vegetable, mineral and synthetic oils, and oil-based paints.

**ROXYSORB** reduces waste and reprocessing costs thanks to its great absorption capacity and its low density. It eliminates any fatty films in order to avoid slippery floors.

**ROXYSORB** can also be used to absorb water-based liquids or bodily body fluids (blood, urine and vomit), food products, paints, and water-soluble chemicals.

#### FIELD OF APPLICATION

AUTOMOBILES - BOATS - GO KARTS - MOTORCYCLES - INDUSTRIES

#### ADVANTAGES

- Recycled cotton fibers in form of powder that is reusable until saturation, after filtration
- Absorbs up to 10 times more than traditional sawdust and granules
- Does not release the absorbed product
- Biodegradable
- Suitable for fuels, lubes and a wide range of liquids, including DG Class 3, 6 and 9 liquids.
- Completely dries the floor - no secondary clean up required.
- Quick, safe and easy to use.

#### METHOD OF USE

- Surround spill with **ROXYSORB**
- Completely cover the spill with **ROXYSORB**
- Sweep back and forth with a stiff broom to absorb the liquid
- Pick up the used absorbent with dust pan

As long as the absorbent is in powder form, you can re-use the product. The appearance of non-sticky "balls" (like playdough) is a visual indicator that tells you when the absorbent is saturated. **ROXYSORB** can be re-used 2 to 3 times.

Using **ROXYPACK** to sieve **ROXYSORB** enables to easily collect any non-saturated absorbent in order to re-use it again later. Dispose of all used absorbent materials in a special-waste container.

#### PRECAUTIONS

For professional use. Consult the MSDS (upon request only).

The information in our brochures, letters, reviews and reports is provided to advise you especially regarding testing that has been carried out, with an ongoing concern for objectivity and without any commitment on our part.

#### PACKAGING

30-litre bag  
Pallet of 48 bags

**ROXYPACK**  
Spill kit to use with the  
**ROXYSORB** absorbent

The sieve enables to recycle  
the non-saturated  
**ROXYSORB** fiber

## ECOLOGICAL COTTON - BASED ABSORBENT

**THE PROFESSIONAL RANGE**

**AUTOMOBILES - MOTORCYCLES - BOATS - GO KARTING**

### INSTRUCTIONS

Use the shovel to take the absorbent via the hopper-door

**1**

Recover the absorbent and pour it over the sieve

**5**

Pour the absorbent around the spillage area

**2**

Soiled "balls" remain on the sieve, unused fibre is recycled

**6**

Cover the complete spillage

**3**

The floor is now completely dry after using Roxysorb

**7**

Brush firmly

**4**

Throw the "balls" into packaging designed for Special Industrial Waste. The hydrocarbons are retained in the fibre.

**8**

For professional use. Consult the SDS (on request only).

The information in our brochures, letters, reviews and reports is provided to advise you especially regarding testing that has been carried out, with an ongoing concern for objectivity and without any commitment on our part.
